PEF Statement
Session -2026-2027

Pupil Equity Funding

As part of the Scottish Government's Scottish Attainment Challenge, Pupil Equity Funding is given to schools each year to help them support children's learning opportunities, particularly children impacted by poverty. The staff at Woodmuir Primary School are committed to ensuring equity for all children in our school and work hard to help all children achieve success. This year, our school was given £4,900, and this money has been used to employ a part-time Pupil Support Worker to support a range of universal and targeted learning opportunities.

Literacy

We have planned literacy intervntions to develop identified children's :

- Knowledge of Fry's Words
- Blending skills

Numeracy

We have planned targeted interventions to develop children's conceptual understanding in mathematics.

Health and Wellbeing

We have planned a Cycling Skills Workshop to develop children's confidence and safety awareness whilst riding their bikes, as well as improving their cycling skills through funa and practical activities.

Participatory Budget

This year we had £147 to spend. The Lundy model was used to plan for our PB spend, this ensures that children's views are heard, respected and acted upon in line with the UNCRC. The children's ideas were then shared with parents and carers to gather their views. Reminders. This year our school community have decided to spend our Participatory Budget on 'Playground Resources'.
