

Woodmuir Primary School

PEF Statement

Session 2024-2025

Pupil Equity Funding

As part of the Scottish Government's Scottish Attainment Challenge, Pupil Equity Funding is given to schools each year to help them support children's learning opportunities, particularly children impacted by poverty. The staff at Woodmuir Primary School are committed to ensuring equity for all children in our school and work hard to help all children achieve success. This year, our school was given £4,900, and this money has been used to employ a part-time Pupil Support Worker to support a range of universal and targeted learning opportunities.

Literacy

This year, we purchased a set of first novels to support our younger readers in the school

We have also planned targeted Literacy interventions to develop identified children's:

- Knowledge of Fry's Words
- Fluency and Phrasing
- Writing Skills

Health & Wellbeing

We have planned weekly outdoor learning sessions and purchased den building materials to support these experiences.

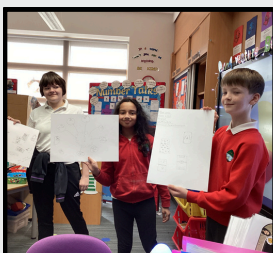

Numeracy

We have also planned targeted interventions to develop children's conceptual understanding in mathematics.

Participatory Budget

This year we had £147 to spend. The Lundy model was used to plan for our PB spend, this ensures that children's views are heard, respected and acted upon in line with the UNCRC. The children's ideas were then shared with parents and carers to gather their views.

This year our school community have decided to spend our Participatory Budget on a 'Climbing Frame' for our playground.
